

I, _____, pledge to install a water-efficient aerator in one of my household sink faucets before February 26, 2016. Water-wise aerators can save four or more gallons a day, depending on household size and your current sink aerator. This savings amounts to 1,460 gallons of water per year!

If every household in Polk County installed a water saving device like this, residents could save more than 395 million gallons a year! That equates to a daily savings of 1MGD or roughly 1.5% of Polk County's current consumptive use.

My signature below indicates that I have received a complimentary aerator and pledge to install it in my home prior to February 26, 2016 as a part of my participation in Water School and as a show of support for water conservation in Polk County.

Your Pledge's Daily Savings:	4 Gallons
Your Pledge's Annual Savings:	1460 Gallons

Signature

Date

Gallons saved estimated using a savings of four gallons per day in 282,730 households, as estimated by the 2014 census.
