

## Ornamental and Turf License Weeds Primer

- A weed is a \_\_\_\_\_ growing in the wrong \_\_\_\_\_.
- Annual weeds live for \_\_\_\_\_, and then they make \_\_\_\_\_ and die.
- Perennials live for \_\_\_\_\_ than \_\_\_\_\_.
- Biennials live for \_\_\_\_\_. They generally produce \_\_\_\_\_ growth the first year, and \_\_\_\_\_ the second year.

- Grasses have \_\_\_\_\_ stems.

Grasses have \_\_\_\_\_ veins.

Grasses have leaves that are longer than \_\_\_\_\_.

Grasses have \_\_\_\_\_ leaf in their seeds.

- Sedges have \_\_\_\_\_ stems.

Sedges do not produce \_\_\_\_\_.

Sedges have \_\_\_\_\_ leaves in groups of \_\_\_\_\_.

- Broadleaf weeds have \_\_\_\_\_ veins.

Broadleaf weeds have \_\_\_\_\_ leaves in their seeds.

- \_\_\_\_\_ is a perennial broadleaf weed.

\_\_\_\_\_ is a common perennial broadleaf weed.

\_\_\_\_\_ is a common annual broadleaf weed.

\_\_\_\_\_ is a common perennial grassy weed.

\_\_\_\_\_ is a common annual grassy weed.

Common perennial sedges in the landscape are \_\_\_\_\_ and \_\_\_\_\_.

- The active ingredient in Roundup is \_\_\_\_\_.

Roundup is a \_\_\_\_\_ herbicide, which means it will affect any plants in contact with.

Roundup is a \_\_\_\_\_ herbicide, which means it works on plants that have already germinated.

\_\_\_\_\_ is an example of a selective, postemergence \_\_\_\_\_.

\_\_\_\_\_ herbicides work best on seedlings and actively growing weeds.

\_\_\_\_\_ is damage caused to desirable plants from chemical applications.
